

Actuated & Manual Isolation Valves

The latest chlorine production plant in Malaysia with a capacity of 74,000 tons per year has chosen Hunt & Mitton actuated and manual isolating valves to ensure accurate and safe control of chlorine for their plant in Selangor province. A total of 176 units in valve sizes up to DN25 to DN100 will be isolating liquid and gaseous chlorine at this new chlorine production plant. The valves will be completed in December and commissioned in the months ahead. We are proud to add this new company to our ever growing list of new customers.

Chlorine Control Valves

The UK's largest chlorine production facility has awarded Hunt & Mitton orders for chlorine service bellows seal control valves in their latest production plant project. A total of 20 units in valve sizes of DN80 to DN250 will be made by our team in Dafeng. We continue to offer our expertise, flexibility and high levels of service to satisfy our customer's demand for high specification products for use on hazardous chemicals. The valves will be produced, tested and commissioned in the months ahead ready for installation in spring / summer 2022.

Re Certification and NEW Approval Application

Series 8800/1 & 8900/1 ON/OFF. Series 5801 Control Valves—8850/1 Actuated ON/OFF

HMV's range of Manual straight & angle body valves have been recertified by Euro chlor to the latest specification 17/492 for liquid and dry gaseous chlorine service. The new specification replaces the older 06/318. The Approval recertification follows an extensive audit from the team at TUV Sud into our designs, manufacturing processes, testing and certification for our facility in Dafeng. Congratulations to Ludovic and everyone in the team at Dafeng that contributed to the audit and recertification process. The Control Valve 5801 series are currently in process for their approval to 17/492 and the actuated 8850/1 series are still approved until 2024 by Euro chlor.

Chlorine Isolation Valves

The Indian west coast state of Gujarat is the destination for 74 of our bellows seal actuated and manual valves in sizes DN25 to DN150, that will be used by one of the biggest chlor-alkali producers in India. We are proud that this premier chlor-alkali producer chose Hunt & Mitton's range of Bellows Seal Valves for their tank filling and vaporising units. The valves will be commissioned in the coming weeks and our high level of customer service will be provided by our HM Flow Controls colleagues. The first consignment of these valves are arriving in India in December and the remaining units will arrive in January on schedule.
