

Hunt & Mitton Presents & Exhibits at CloroSur 2022 in Brazil

CloroSur, the association of Latin American Chlor-Alkali Producers and Partners held their 12th Technical Conference and Technical workshop and Exhibition 20 to 23 November in Bahia Brazil. Hunt & Mitton presented a look at the Euro Chlor approval process for Bellows Seal Globe Control Valves Performance v Zero Leakage Emissions. Producers from Argentina, Paraguay, Ecuador, Columbia, Mexico and Brazil were in attendance. HMV were supported by our distributors EBP Solutions based in Sao Paulo Brazil and our thanks goes to Marcelo who assisted in all aspects of a very busy and successful exhibition and has a long list of follow up invitations to fulfil over the next few months.

Hunt & Mitton Chosen for Chlorine Service in Poland

The largest chlorine producer in Poland chose Hunt & Mitton's Series 8800/8801 bellows seal globe isolation valves for their liquid chlorine application used in the storage of chlorine in the south west of Poland where most of the chlorine will be used for water treatment. Working along side our distributors Dawcul we successfully negotiated the contract. A total of 21 valves have been supplied to this application and we appreciate the efforts of Kris and Tomasz from the local Dawcul office.

Hunt & Mitton Extends its Support for Europe

To assist customers within the European Union and their PED documentation requirements, we have established a company in the Netherlands. The new company located in Amsterdam will allow us to further improve our support to our customers and distributors, ensuring our commitment to the high customer service levels that we offer.

Chlor-Alkali Success in Southern India for Hunt & Mitton

When it came to choosing which brand to trust with their investment in their chlor-alkali plant this new customer chose our HMV brand. The end user has placed their faith in our range of actuated isolation and Bellows seal Globe Control valves to ensure the safe and accurate control of the chlorine service in Southern India. We welcome them to our growing network of end users and look forward to further developing our supply to them in 2023.

USA End User Acceptances add to a Strong 2022

Our exclusive USA distributor Chemflow Products have been very busy behind the scenes working with end users throughout the year. Strategic successes have resulted in HMV products now being accepted by some of the biggest names in the chlor-alkali sector in the USA. Customers in Calvert City, El Dorado, Magnolia and Geismar all use Hunt & Mitton products for their hazardous chemical applications. Congratulations to the team at Chemflow for their hard work in getting this strategic work completed. As a result, we all look forward to more growth in the year ahead.
