

Wanhua Engineers Visit New Nanyang Factory

In late November we welcomed two engineers from Wanhua's Ningbo plant to our new facility in Nanyang. Wanhua's representatives investigated our production and testing processes, certification and documentation during their factory tour and held meetings with our Manufacturing, Quality Assurance and Commercial departments. They gave a very positive response at the conclusion of their visit and we look forward to continuing to supply our products to the Wanhua Group of companies.

Allied Valve Specialists in Control

When one of the leading producers of Chlor-Alkali derivatives in South Africa needed to solve a control problem on liquid chlorine, they asked AVS/HMV to solve the issue of supplying consistent and accurate flow to their HCl burner as part of their process. HMV's 5801 Bellows Seal Globe Control Valves which have already proven themselves on other chlorine applications were again chosen to solve the problem. The Euro Chlor approved control valves have built a great reputation for solving operational application problems on chlorine liquid and gas service.

Louisiana chooses HMV Products

One of the world's leading producers of Chlor-Alkali derivatives with multiple locations in the United States has chosen HMV products to ensure positive isolation of liquid chlorine as part of their manufacturing and storage process for upgrades at their Westlake South Plant. Various quantities of Euro Chlor approved Bellows Seal Globe valves will be supplied by our exclusive distributor Chemflow Products who service the chlor-alkali industry from their head quarters in Houston Texas. The team at Chemflow have been working hard for the last two years on getting HMV products onto the approved vendors list which is now bearing fruit for suppliers and end users.

China Chlor Alkali Industry Association—Xiamen Fujian Province

China International Chlor Alkali Conference was held in Xiamen, Fujian Province, with nearly 400 representatives from more than 20 countries and regions around the world attending the conference. This was the first conference to be held in person since 2019. Hunt & Mitton exhibited at the conference and showcased our range of Manual, actuated isolation valves and Control valves for hazardous service in the chlor-alkali industry.
